Re: U.S. Patent Appl for *TISSUE SPECIFIC VIRAL VECTORS*
Our Reference: A-62115/BIR CALY-002

Dear Dr. Henderson:

A draft of the above-identified application has now been completed and is enclosed for review by you and the other inventors. Also enclosed are a brief discussion of inventorship and an Invention Information form to be returned to me with the name, address and citizenship of each inventor.

An attempt has been made to draft the application as broadly as possible while attempting to define as many specific examples as possible within the limits of the disclosure made available to us. Please review the application while considering whether all broad aspects of the invention, as well as any specific examples that you consider of particular importance, have been included. In addition, specific questions and blank spaces are included in the draft, and I would appreciate your answering or filling in. If unable, just leave them blank and I will try to get the information or leave it out.

Please do not hesitate to comment on or to question anything in this draft application. Please provide me with all relevant literature of which you and the inventors are aware. By relevant is intended important background articles, and any literature which could affect an Examiner's decision in the allowance of a claim.

If you have a number of comments, they can be most expeditiously handled if you return the draft marked with your comments, together with any additional pages or information that you wish included. If you have only a few comments, you may call me and I will include them in a final draft. In either event, do not hesitate to call if you have any questions regarding the application.

Very truly yours,

FLEHR, HOHBACH, TEST,
ALBRITTON & HERBERT
